# China National Textile and Apparel Council (CNTAC)

China National Textile and Apparel Council, abbreviated as CNTAC, is the national Federation of all textile-related industries, with the following-listed textile industrial associations and the other economic entities as the registered members, and is a non-profit organization formed on a voluntary basis.

The mission of CNTAC is to abide by the constitution, laws and regulations; adhere to the scientific outlook on development; insist on taking a new road to industrialization; improve the self-regulation system of the industry; protect the rights and interests of members and enterprises; carry out the national industrial policies and the functions authorized and entrusted by the government; actively guide the development of the industry, serve its members, enterprises, the industry and government; and promote the sound development of China's textile and apparel industry.

## **Main Tasks of CNTAC:**

1. Study and research the status quo and the development trend of the domestic and international textile industries.
2. Participate in and/or provide consulting services in aspects of development strategy, technological progress, and legislation.
3. Work out the guidelines and rules to supervise the performance of the industry, set up and improve the self-regulation working system and protect the interest of the industry.
4. Carry out industrial development strategies plans and industrial policies to adjust the industrial structure, technological progress, branding, market expansion etc.
5. Coordinate the economic and technical relations between various sectors of the textile industry to promote the industrial rationalization and re-consolidation, and strengthen the industrial value-chain integration and cooperation.
6. Collect, analyze and issue industrial information, conduct relevant surveys and develop e-commerce into activities.
7. Carry out the international technical and economic cooperation and interchanges.
8. Participate in formulating the medium and long-term scientific and technological development strategy, work out and amend the industrial standards, and organize the relevant resources to implement these standards.
9. Carry out various introduction and promotion activities in terms of trade, science and technology, investment, human resources and management for the textile industry.
10. Edit and print out textile publications.
11. Organize professional training programmers.
12. Promote public undertakings of the textile industry.
13. Undertake tasks entrusted by the government.

CNTAC focuses its services on such 12 sectors as cotton, wool, silk, leaf-fiber, knitting, yarn-dyed weaving, dyeing-printing-finishing, home-textile, non-wovens and industrial textile, apparel, chemical fiber, and textile machinery, and encourages the member associations to carry out their own work independently in accordance with the respective rules and regulations. CNTAC also coordinates on a team-work basis the relevant services among the member associations to organize a specialized professional team to serve the entire industry.

In the principle of streamlined staff, orderly process and efficiency, CNTAC is composed of 10 department: General office, Personnel Department, Finance Department, Foreign Affairs Office (also Taiwan, Hong Kong, Macao Affairs Office), Industry Consulting Department, Marketing Department, Science & Technology Department, Information & Statistics Department, Planning Department, CNTAC Shanghai Office.

## The Sub-Council of Textile Industry, China Council for the Promotion of International Trade (CCPIT TEX)

Established in 1988, the Sub-Council of Textile Industry, China Council for the Promotion of International Trade (CCPITTEX) is named at the same time "Textile Industry Chamber of Commerce, China Chamber of International Commerce" and "Textile International Trade Promotion Center", which belongs to China National Textile & Apparel Council (CNTAC). CCPIT TEX is under the leadership of China Council for the Promotion of International Trade (CCPIT) and China National Textile & Apparel Council (CNTAC). After its establishment, CCPIT TEX is devoted to the promotion of trade contact and economic cooperation in textile and garment industry and enterprises, CCPIT TEX is doing all the best for the continuous development of the textile industry.

### **The prime mission of CCPIT TEX:**

1. Organizing various textile and garment exhibitions and trade fairs both at home and abroad.
2. Organizing activities on international trade and professional programs in textile circle.
3. Contacting international textile, garment and trade circles; inviting and hosting foreign technical personnel and trade delegations of textile and garment circle to China for international cooperation.
4. Organizing domestic delegation of international trade and technicians to abroad for business and extending international market, enlarging export and investment to overseas.
5. Undertaking collection and researching of trade and investment.

# China Knitting Industrial Association (CKIA)

Founded in May 1990, the China Knitting Industrial Association (hereinafter referred to as "CKIA") is a national industrial association registered with the Ministry of Civil Affairs of the People's Republic of China.

The knitting industry covers a complete industrial chain including yarn production, fabric knitting and dyeing & finishing, garment manufacturing, international trade, and brand marketing. Its product includes warp and weft knitted fabrics, underwear, loungewear, swimwear, T-shirts, infant and children's knitted apparel, sportswear, flat-knitted sweaters, knitted outerwear, socks, gloves, scarves, hats, knitted shoe upper materials, knitted home textiles, and technical knitted textiles.

By the end of 2025, CKIA had more than 500 members and served 35 knitting industrial clusters. Its membership comprises a group of nationally renowned enterprises and institutions engaged in knitting and textile production, research, and development.

## **Mission**

CKIA implements the guidelines and policies of the Communist Party of China and the Chinese government, acts as a bridge and link between the government and its members, safeguards the legitimate rights and interests of members, provides professional services for the entire industry, and promotes the sound development of the knitting sector.

## **Core Functions**

In line with its mission of serving the industry and enterprises, CKIA performs the following major functions:

1. Assist government authorities in regulating industry governance and organizing industry activities.
2. Convey the aspirations and demands of enterprises to the government, smooth communication channels, and deliver services to enterprises.
3. Conduct basic industry surveys, analyze industry conditions, and advise the government on industrial development plans, economic policies, and economic legislation.
4. Publish journals and bulletins in accordance with relevant regulations, collect and disseminate economic and technical information, organize experience exchanges, and provide consulting services.
5. Deliver professional training through various forms to enhance the competence of enterprise employees.
6. Organize product exhibitions and trade fairs entrusted by the government or as required by market and industrial development.
7. Promote horizontal economic cooperation among industrial sectors and coordinate business and technical collaboration among enterprises.
8. Undertake initiatives beneficial to enterprises and consumers to support the healthy development of the industry.
9. Conduct international economic and technical exchanges and cooperation.
10. Undertake and fulfill all tasks assigned by government and competent industrial authorities.

With the further improvement of the market economy, industrial associations will play an increasingly vital role. CKIA will continue to broaden our mindset, pioneer and innovate, deliver better services to enterprises, and strengthen its role as a bridge and link.

The China Knitting Industrial Association stands ready to strengthen ties and cooperation with all parties, guide the sound development of the knitting industry, and contribute to the sustained prosperity of China's textile industry.

## Chinese Textile & Garment Association in Myanmar

The Chinese Textile & Garment Association in Myanmar, established in 2017 under the guidance of the Chinese Embassy in Myanmar, is the first industry association in Myanmar and currently has 200 members with around 300 factories. It encompasses Chinese-invested textile and garment enterprises in Myanmar, employing approximately 350,000 local workers, and generating over 3 billion USD in annual export earnings. It is one of the most influential industry associations in Myanmar.

### Main Responsibilities:

- Assist the Commercial Office of the Chinese Embassy in the regulation and management of Chinese-invested textile and garment enterprises.
- Conduct annual audits of member companies and issue recommendation letters for the annual extension of import and export licenses.
- Organize member companies to participate in various meetings and exhibitions.
- Host the annual Myanmar International Textile Exhibition.
- Regularly hold seminars on Myanmar investment, finance, and labor policies for member companies.
- Assist member companies in communicating with various levels of the Myanmar government.
- Establish a Facebook public opinion response mechanism to promptly monitor, address, and mitigate or eliminate impacts related to our Chinese-invested enterprises.
- Establish contacts with textile and garment industry associations in Thailand, Vietnam, Cambodia, and other countries.

## Lanxi Vega Linen Textile Co., Ltd.

The interweaving of warp and weft stretches vertically and horizontally for thousands of years. With the gift of nature, Lanxi Vega Linen Textile Co., Ltd. was born in Lanxi County, Heilongjiang Province, the hometown of Flax in China in 2002. Between the warp and weft, the green linen fabric dream of Lanxi Vega has been spun with ingenuity, concentration and devotion. It has become the only one private enterprise in China that integrates the whole production chain of linen spinning, weaving and bleaching, and has become one of the top ten global suppliers of high-quality linen fabrics.

All the raw materials of Lanxi Vega are 100% imported from Europe, and have certified by the EUROPEAN FLAX® European linen origin with full traceability. We respect the natural gene of each yarn, while the modern technology makes it have vitality beyond time.

The company covers a total area of 120,000 square meters, with the process and production of more than 5,000 tons of linen yarn, and 30million meters of bleached cloth every year. The company has two spinning mills, one weaving mill and one finishing mill. There are 25 scientific research personnel, 11 technical personnel, and more than 1,000 grass-roots employees.

From raw material to yarn, gray cloth to bleached cloth, and cloth to clothing... each process has been tested and inspected at each level for batches, strength, color difference, shrinkage and other indicators to ensure high-quality linen fabrics that meet international standards.

The company's import and export volume has been ranking among the top ten in Heilongjiang Province for five consecutive years, and the export of linen half-bleached cloth has been ranking first in China for five consecutive years. And it has successively won the "China's Top 500 Textile and Garment Enterprises", "China's Top 10 Linen Textile Industry", Top 30 Private Enterprises Contributing to Export-oriented Economy in Heilongjiang in 2022, EUROPEAN FLAX (European Flax) Certified Enterprise and a high-quality supplier of renewable and environmentally friendly supply chain system of INDITEX Group. In addition, driven by product innovation, the company has formed a stable supply and marketing channel in the European and American markets, covering major commercial markets in Italy, Spain, Turkey, Vietnam, the United States, Canada and Australia, etc. It has established an "overseas warehouse" in Florence, Italy, to carry out linen sales, logistics distribution, after-sales service through direct sales, realizing a 3-hour fast sales service from the customer's order to the warehouse and delivery. At present, the company has achieved a sales growth of about 8% in overseas markets for five consecutive years, occupying a market share of more than 70% in the linen fabric market in Florence, Italy.

## Zhejiang Jinma Technology Co., Ltd.

Zhejiang Jinma Automation Technology Co., Ltd. was founded in June 2009, Xinchang Jinma Technology Co., Ltd. evolved, is a professional engaged in textile equipment intelligent control system research and development, production, sales and service of high-tech enterprises. The registered capital of the company is 10 million yuan, and the existing employees are more than 80 people, more than 20 technical personnel, including 4 master's degree, and 50% bachelor's degree or above. The company is located at No.16 Meixi Road, Chengtan Street, Xinchang County, Zhejiang Province.

Based on intelligent control technology with independent intellectual property rights, the company serves middle and high-end customers in China with industry-leading products and system solutions to achieve the goal of growing corporate value and customer value together. The main products are: Intelligent control system of covered wire machine (electronic forming), short fiber double twist machine (electronic forming) charging system, chemical fiber double twist machine (electronic forming) intelligent control system, large roll double twist machine (electronic forming) intelligent control system, yarn intelligent control system, one step twist intelligent control system, rotary spinning intelligent control system, rotary cup spinning automatic doffing and changing machine, automatic yarn cylinder counterweight packaging machine, etc. Using the latest embedded technology, complete network technology and advanced control algorithm, the technology is in the domestic leading level. Established long-term cooperative relations with Jingwei, Rifa Textile Machinery, Titan Shares and other enterprises, and has occupied a certain market share in China.

The company under the jurisdiction of Zhejiang Jinma Automation Technology Co., Ltd. Hangzhou branch, specializing in the textile, printing and dyeing industry intelligent system research and development.

At present, the company has obtained 9 invention patents, 27 utility model patents and 35 software Copyrights, and 3 innovation funds and provincial new product technology projects. Since 2014, it has successively won a series of honors and titles such as "National High-tech Enterprise", "Zhejiang Software Enterprise", "Zhejiang Science and Technology SMES", "Shaoxing Municipal Enterprise Technology Center", "Provincial intelligent transformation engineering Service Company", "Shaoxing Municipal R & D Center", and "Xinchang County Patent Demonstration Enterprise". In 2018, it was identified as a key growth small and medium-sized enterprise in Xinchang County by the county government.

**Mr. Luo Xinghao**

President

**Yiwu Wanyi Technology Development Co., Ltd.**

 86 139 0689 1016

# Yiwu Wanyi Technology Development Co., Ltd.

Wanyi Technology was founded in 1996, Covers an area of 33,000 square meters, the building area is more than 100 thousand square meters, with more than 300 sets of Italian Santoni full computerized knitting jacquard special machines, and currently has more than 1,000 high-quality employees. After several years of vigorous development, Wanyi Technology has now become a modern seamless underwear professional production enterprise integrating product development, design, production, marketing, after-sale service, import and export.

## **Scale Production and Marketing, World Forefront**

The company provides ODM & OEM services for all kinds of clients. Under the company, we have "Wan Yi" "Qian Yan" and other independent underwear brands. Wanyi Technology has also established a convenient marketing and after-sale service system, involving underwear, panties, bras, sports, yoga series and other seamless products. The company's products are not only sold in markets across the country, but also exported to Europe, the United States, Japan and other countries and regions, loved by consumers at home and abroad, it is the leading enterprise in the seamless underwear industry.

## **Innovative Development, Guiding The Future**

Since its inception, the company has focused on the research of advanced automatic seamless underwear weaving technology, as well as continuous technological innovation. We have invested a lot of seamless underwear weaving machines and their ancillary equipment from Italy to ensure the technical innovation and R&D of our products from the hardware base. We have been cooperating with Santoni in the field of international knitting technology for a long time, which has strongly promoted the industrial transformation of the technical achievements of the company, solved a lot of technical problems of various kinds, guided the company in the reconstruction of energy-saving technical reform demonstration production lines, and developed a lot of new styles of the seamless underwear.

## **Industry Benchmark, Comprehensive Certification**

The company has passed ISO9001 quality management, ISO14001 environmental management, OHSAS18001 occupational health management system, Oeko-Tex Standard 100 international environmental protection certification, WRAP, BSCI, GRS, COSTCO, SEDEX, SLCP, Clean Production, Standardization of Good Behavior AAA level and other system certification. Moreover, the company has been awarded as one of the "Top 100 Enterprises in China's Garment Industry", a Green Enterprise in Zhejiang Province, and a AAA Contract-Abiding and Trustworthy Unit. At the same time, the company has also been awarded as one of the "Top 50 Industrial Enterprises" in Yiwu City, a National High-Tech Enterprise, a Provincial-Level Science and Technology-Based small and medium-sized Enterprise, and an A-Class Enterprise in the comprehensive evaluation of industrial enterprises' efficiency per mu. Besides, the company has been awarded "Patent Demonstration Enterprise", "Advanced Unit of Comprehensive Social Management", "Model Enterprise of Safety Production Management", "Advanced Unit of Science and Technology Innovation", "Credit Unit of Labour Security", "Advanced Unit of Creating Learning Enterprise", "Advanced Unit of Self-Supporting Import and Export" and other honors for many years. The trademark of "Wan Yi" has also been awarded as "Famous Brand Products of Zhejiang Province" and "Famous Trademark of Zhejiang Province".

The company's spirit of "Honesty, Innovation, Pragmatism and Unity" has always inspired "Wangyi staff" to keep moving forward, and the hard-working and enterprising "Wangyi staff" sincerely look forward to cooperating with friends from all circles, create mutual benefit and a much more brilliant future.

## Foshan Shunde Caihui Textile Group Co., Ltd.

Foshan Shunde Caihui Textile Group Co., Ltd. was established in 2001 and is located at No. 7 Wei'er Road, Daba Industrial Zone, Longjiang Town, Shunde District, Foshan City, Guangdong Province. It covers an area of over 100000 square meters and is a wholly-owned holding enterprise in Hong Kong. It is a high-tech enterprise specializing in the production of high-end mixed knitted and knitted fabrics, mainly composed of knitted, mercerized, and cotton. It has long-term cooperation with domestic and foreign top clothing brands. The total number of people is 500, with 25% of those with master's degree and 35% of those with management and technician's degree. With relatively strong technical force, it has cooperated with Wuhan Textile University for a long time to become its graduate training base. Possessing strong technological research and development capabilities, with an annual output of 18000 tons. The enterprise has passed industry admission, clean production, safety production standardization, ISO9001, ISO14001, RCS, OCS certification. Invest in a well-established environmental treatment system and operate with the concept of green and environmentally friendly development. The company has industry-leading production equipment and digital management platform, and the production equipment is a new type of advanced dyeing and finishing processing equipment, including Fengguang's open-width mercerizing machine, singeing machine, Sanderson's pre-shrinking machine, continuous steaming machine, Menfu type setting machine and Lixin dyeing machine, three technology low bath ratio dyeing machine, continuous pre and post treatment long machine for knitted fabric, and other advanced production equipment. Through continuous efforts and perseverance, we now have a comprehensive mercerization production workshop and modular dyeing and finishing as well as pre and post treatment workshops. Combining our scientific production management model, our products have passed the Oeko Tex standard 100 Level 1 certification, and relying on our own strength and influence, we have been awarded the 2016 National Textile Industry Energy Conservation and Emission Reduction Technology Application Demonstration Enterprise; The company's environmentally friendly fabric dyeing services and energy-saving and environmentally friendly mercerization dyeing and finishing processing services were recognized as high-tech products in Guangdong Province in 2017. In November 2018, it was awarded the honor of national green factory by the Ministry of Industry and Information Technology of the Ministry of Industry and Information Technology. In December 2022, the digital intelligent dyeing production line technology transformation project was included in the national major construction project library.

The company always regards product quality as the life of the enterprise, constantly improving, innovating, and seeking truth and practicality. It enjoys a high reputation in the same industry and has also won unanimous praise from customers. It has a unique leading position in the mercerized cotton dyeing and finishing industry. We have always adhered to focusing on the waterway of high-end fabrics, resisting all temptations; Persist in not taking shortcuts, reject opportunism, be down-to-earth, long-term investment, and accumulate knowledge; Adhere to customer-centered, striving for excellence, long-term hard work, and self criticism. We will not disappoint the historic opportunity bestowed upon us by the generosity of the times. As a leading fabric supplier, we are creating a colorful world of high-end fabrics, moving forward and becoming a responsible enterprise for society, the environment, and the future.

## Guangdong Kaidi Garments Co., Ltd.

Founded in 2001, Guangdong Kaidi is chaired by Ma Qingxuan, who is a member of the Shantou Committee of Chinese People's Political Consultative Conference (CPPCC) and the Executive Vice President of the Shantou Textile & Garment Industry Association. The company has a total investment of fifty million U.S. dollars and is a large-scale enterprise integrating research and development, design, manufacturing, and sales of clothing and personal care products. The company employs over one thousand people. After years of operation and accumulation, the company has established advanced industrial park bases integrating production, supply and marketing. It not only has world-renowned advanced production lines and production technologies, but also has a strong elite and excellent team, international advanced design concepts and capabilities, and a perfect after-sales service system. It has successively created well-known brands such as PBENO, La Nouvelle Famille, and FIARADY, covering the following categories: workwear, home wear, sleepwear, bras, men's and women's underwear, thermal underwear, shapewear, personal care products, and baby clothing, etc. Product sales cover all corners of the world and have been recognized and followed by consumers with an annual output value exceeding 200 million U.S. dollars and a production capacity of five million sets of clothing. The products are exported to the United States, Europe, the Middle East, and Russia.

The company is committed to technological innovation, holds fifteen patents, and has achieved great success in researching and developing various functional health fabrics and personal care products with traditional Chinese herbal ingredients. The products are now mass-produced in China, and in 2023, the company established a subsidiary in Kazakhstan to enter the Central Asian market.
